# **Internet Resources**

**Compiled for Gifted Students, their Parents, and Teachers**

**by Aleene B. Nielson. Ph. D.**

**Updated July 22, 2001**

The World Wide Web is a dynamic link among computer users around the world. New sites open daily; others close. URL (Uniform Resource Locator) addresses change and some sites, previously free, (e.g., *Encyclopedia Britannica*) have become subscription sites. As you surf the web and visit some of the links listed in this guide, you may find links that are no longer active; you may find others that include advertisements, and still others (e.g., *The New York Times* or *Teachers College Record*) that require you to register.

Care has been taken to review all recommended sites carefully. Because of the extensive links at many of the sites, you may find some sites that do not meet your standards. Use your discretion in the choice of sites you make available to your students and allow other parents and educators the same privilege.
